

Case Data Entry Section

This section is a basic summarization of the case. Please fill out the requested fields completely. See the links below for a few simple examples.

- Clinical summary ([see example](#))
- Operative summary ([see example](#))
- Pathology summary ([see example](#))
- Gross pathology summary ([see example](#))

Radiologists and radiation oncologists should not claim as their intellectual property that which is not theirs. Plagiarism or the use of others' work without attribution is unethical. Please review the [American College of Radiology - Code of Ethics](#).

Helpful Tips:

- Summaries should NOT be taken verbatim from reports. You must summarize the reports and note pertinent findings.
- Please prepare and save your summaries in a Word document, then copy your summary into the required fields.
- Be sure to “save” your work frequently during the data entry process.
- Entries must be written in English.
- Differential diagnosis must be selected from the drop menu. If your selection is not there, please contact the section chief for their recommendation.

Students must PRINT a copy of the Verification/Consent Form* using the “Print for Verification/Consent Form” button near the top of the Case Data Entry page after completing the page validations. The Verification/Consent form must be completed and SIGNED BY YOUR PATHOLOGIST. The form not only confirms that the correct pathology is being submitted but also that AIRP has permission to use the slides in conjunction with radiologic pathology education.

**The form is available for print after completing the case data entry page and submitting an autopsy or pathology report on the upload documents page.*

PATHOLOGIC SLIDES WILL NOT BE ACCEPTED AT THE COURSE WITHOUT THE PRINTED AND SIGNED FORM.
